SUPPLEMENT

25X1X6

1. Kaliningrad (Koenigsberg) is no longer used exclusively as a port of transshipment for commercial goods, but is being put to use primarily as a repair and supply base for the enlarged naval base at Pillau.
2. The base at Pillau is constructed chiefly to accommodate submarines, mine layers, speed boats, and torpedo boats. All speed boats and torpedo boats are reported to be equipped with remote control instruments. Practice maneuvers with these instruments are undertaken daily. The Pillau naval base includes twelve 300-meter jetties and about sixteen repair and anchorage pens, the reinforced concrete roofs of which are 16 to 20 meters in diameter.
3. Near Fischhausen, which has been cleared of civilians, large repair pens have been constructed for overhauling the naval units from Pillau according to the latest methods. The installations can undertake repairs on about 20 submarines, 8 torpedo boats, and about 50 speed boats simultaneously. The pens are located 1500 meters west of Fischhausen in the bay of Pillau.
4. Near Marienhof, a modern airfield with underground hangars has been constructed. It is estimated that these hangars contain about 150 jet-propelled planes (F-5 for number).
